

# STL

The STL is our standard LED Andon Tower Light. It is 57mm in diameter with a sturdy through pole design and lenses which are smooth for easy wipe down. The STL is suited for use on pieces of equipment, manufacturing floors, assembly areas and laboratories. It has 24 bright LED in the red and amber sections and 18 larger LEDs in the green, blue and clear sections.

## MODEL TYPES

- STL - Continuous LED light
- STLB - Continuous LED light with audible alarm (83dB at 1M)
- STLF - Continuous and flashing LED light
- STLZ - Continuous and flashing LED light with audible alarm (83dB at 1M)

## FEATURES

- Our LED design balances cost and maintenance free operation
- Durable industrial control box is environmentally sealed
- 8 foot power cord allows easy installation in any location
- Standard pole length 12 inches with right angle mounting bracket
- Industrial selector switches used for off/on, on/off/flash or audible functions
